📍 Philippines

Summary

Full-Stack Engineer with 8+ years of experience architecting and scaling SaaS platforms, web applications, and cloud-based systems. Specialized in Python, Django, JavaScript/TypeScript, REST APIs, and database optimization. Delivered secure, high-performance SaaS applications supporting scalable cloud infrastructure, backend reliability, and modern software architecture across startup and agile environments.

Professional Experience

Swiftkind, CEO • Spearheaded engineering initiatives that scaled SaaS infrastructure to support thousands of concurrent users across cloud-based environments. • Directed cross-functional teams of 10+ engineers, designers, and operations staff to deliver high-availability SaaS applications, improving deployment efficiency by 45%. • Reduced deployment turnaround time by 45% through CI/CD optimization and infrastructure automation. • Architected backend systems that strengthened platform stability, scalability, and long-term maintainability. • Increased engineering productivity by 35% through agile workflow optimization, sprint automation, and standardized development practices.	June 2019 – September 2024 Davao, Philippines
Swiftkind, COO • Coordinated engineering operations for 5+ production-grade web platforms supporting high-volume business automation workflows. • Improved API response performance by 35% through backend optimization and database restructuring. • Reduced software release cycles by 30% through agile sprint optimization and deployment standardization initiatives. • Reduced operational downtime by 25% by implementing automated monitoring, debugging workflows, and infrastructure reliability enhancements.	January 2016 – June 2019 Davao City, Philippines
VectorScient, Python Developer • Developed enterprise backend applications handling thousands of automated reporting and analytics transactions daily. • Streamlined third-party reporting integrations, reducing manual processing workloads by 60%.	December 2015 – August 2016 Remote

- Optimized database queries and backend processing pipelines, reducing reporting execution time by 50%.

DealRoom, Lead Developer

June 2015 – April 2016

Remote

- Engineered secure M&A transaction systems handling 0.5K+ confidential financial documents across high-security production environments.
- Implemented authentication and document security systems that reduced unauthorized access incidents by 30%.
- Increased application reliability by reducing deployment-related issues by 35% across production environments.

Fundology, Lead Developer

January 2012 –

June 2015

Davao City, Philippines

- Developed backend and frontend application features that streamlined internal workflows and accelerated platform usability across web applications.
- Resolved debugging and performance bottlenecks that stabilized application reliability and strengthened backend performance.
- Delivered 10+ web and mobile application features across frontend and backend systems within agile development cycles.

Education

Bachelor of Science in Information Management,

Notre Dame of Midsayap College

2005 – 2010

Philippines

Skills

Program Languages

- JavaScript, Python, PHP, Go

Backend

- Django, Node.js, Express.js, Laravel, REST APIs

Blockchain & Web3

- Solidity, Web3.js, Ethers.js, Smart Contracts, Wallet Integration

Frontend

- React.js, Next.js, React Native, Vue.js, Tailwind CSS

Database & Cloud

- MongoDB, PostgreSQL, MySQL, Firebase, Google Cloud Platform (GCP), CI/CD Pipelines
